

SHECO Field Machining & Field Services

Southern Heat Exchanger Corporation now offers portable field machining services in addition to other field services and repairs. SHECO has the manpower, expertise, and equipment to meet your on-site machining needs. We can be scheduled months in advance for a planned turnaround or respond in a matter of hours to accommodate urgent needs. Below is a brief list of services SHECO can offer:

- Machine tubesheets, front and back face up to 130" OD
- Mill tubesheet pass lanes up to 120"
- Machine a wide array of flanges including raised face, flat face, recessed face, ring type joint, and Grayloc ®, among others
- Mill pads for pump bases to within 0.002 in./ft.
- Cut and bevel pipe up to 80" OD
- Drill and tap holes
- Drill out old or broken studs
- Check flatness to within 0.001"
- Line bore up to 85" ID

SHECO employee machining a recessed gasket surface on a tubesheet using an OD mount portable ring flange machine
